

RRC ACADEMY – SCHOOL OF LAW

CLAT UG MODEL QUESTION PAPER – 01

ANSWERS & SOLUTIONS BELOW EVERY QUESTION

SECTION I — ENGLISH LANGUAGE

Passage 1

For much of human history, knowledge travelled slowly. A book produced in one place might take months or years to reach another. The digital age has reversed this situation. Information can now cross continents almost instantaneously. Yet the abundance of information has created a new problem. The difficulty is no longer simply finding information; it is deciding which information deserves attention.

A person who reads widely but accepts every claim uncritically may be as poorly informed as someone who reads very little. Reliable knowledge requires comparison, context and judgment. A headline may attract attention, but understanding requires the reader to examine what lies beneath it.

Question 1

What is the central idea of the passage?

- A. Digital technology has made books unnecessary.
- B. Information is now unavailable to most people.
- C. Access to information has increased the importance of critical judgment.
- D. People should avoid reading information online.

Answer: C — Access to information has increased the importance of critical judgment.

Solution:

The passage explains that information is now available very quickly, but the greater challenge is determining which information is reliable and important. It emphasises **comparison, context and judgment**.

Question 2

According to the passage, what is the modern difficulty?

- A. Finding any information
- B. Deciding which information is reliable and important

- C. Printing books
- D. Communicating across continents

Answer: B — Deciding which information is reliable and important.

Solution:

The passage specifically says the difficulty is no longer merely finding information. The challenge is deciding **which information deserves attention**.

Question 3

The author suggests that a person who accepts every claim uncritically may be:

- A. Highly informed
- B. Poorly informed despite having access to information
- C. Better informed than a careful reader
- D. Unable to access information

Answer: B — Poorly informed despite having access to information.

Solution:

The author says that a person who reads widely but accepts every claim without critical examination may be **as poorly informed** as someone who reads very little.

Question 4

Which of the following is NOT mentioned as necessary for reliable knowledge?

- A. Comparison
- B. Context
- C. Judgment
- D. Speed

Answer: D — Speed.

Solution:

The passage specifically mentions **comparison, context and judgment**. Speed is not identified as a requirement for reliable knowledge.

Question 5

The tone of the passage is best described as:

- A. Analytical
- B. Humorous

- C. Angry
- D. Celebratory

Answer: A — Analytical.

Solution:

The author objectively examines both the benefits of rapid information and the problems created by information overload. Therefore, the tone is analytical.

Passage 2

Education is often measured through examinations. Marks provide a convenient way of comparing students, but they cannot capture every aspect of learning. A student may obtain excellent marks by memorising information without developing the ability to apply it. Another student may understand a difficult concept deeply but perform poorly under examination pressure.

This does not mean examinations have no value. They can encourage discipline, test knowledge and provide a common basis for evaluation. The real challenge is to ensure that examinations measure understanding and reasoning rather than memory alone.

Question 6

What is the author's principal argument?

- A. Examinations should be abolished.
- B. Marks are completely meaningless.
- C. Examinations are useful but should test more than memorisation.
- D. Students should not study for examinations.

Answer: C — Examinations are useful but should test more than memorisation.

Solution:

The author does not reject examinations. Instead, the author says examinations have value but should test **understanding and reasoning**, not merely memory.

Question 7

Which statement is supported by the passage?

- A. Every student who gets high marks understands concepts deeply.
- B. Examinations can provide a common basis for evaluation.
- C. Memory has no role in education.
- D. Examination pressure always improves performance.

Answer: B — Examinations can provide a common basis for evaluation.

Solution:

This is directly stated in the passage. The other choices either contradict the passage or make claims not supported by it.

Question 8

The author would most likely agree that:

- A. Understanding should be irrelevant to assessment.
- B. Reasoning should form part of assessment.
- C. Marks should never be awarded.
- D. All examinations should be oral.

Answer: B — Reasoning should form part of assessment.

Solution:

The author explicitly argues that examinations should measure **understanding and reasoning**.

Question 9

Which assumption is implicit in the passage?

- A. Memorisation alone may not demonstrate complete understanding.
- B. Students never experience examination pressure.
- C. All examinations are unfair.
- D. Marks are always inaccurate.

Answer: A — Memorisation alone may not demonstrate complete understanding.

Solution:

The passage contrasts memorisation with the ability to apply knowledge. Therefore, memorisation alone is insufficient to establish complete understanding.

Question 10

The phrase “common basis for evaluation” most nearly means:

- A. A shared method for assessing students
- B. A method of avoiding examinations
- C. A system of private tutoring
- D. A method of eliminating competition

Answer: A — A shared method for assessing students.

Solution:

A common basis for evaluation means having a standard or shared method through which students can be assessed.

Vocabulary and Language**Question 11**

“Mitigate” most nearly means:

- A. Increase
- B. Reduce
- C. Hide
- D. Repeat

Answer: B — Reduce.

Solution:

“To mitigate” means **to reduce the seriousness, severity or harmful effect of something**.

Question 12

The opposite of “scarce” is:

- A. Rare
- B. Limited
- C. Abundant
- D. Insufficient

Answer: C — Abundant.

Solution:

“Scarce” means limited or insufficient. Its opposite is **abundant**, meaning available in large quantities.

Question 13

Choose the correctly spelt word:

- A. Priviledge
- B. Privilege
- C. Privillage
- D. Privelege

Answer: B — Privilege.

Solution:

The correct spelling is **Privilege**.

Question 14

Choose the grammatically correct sentence:

- A. Neither the student nor the teacher were present.
- B. Neither the student nor the teacher was present.
- C. Neither the student or teacher was present.
- D. Neither student nor teacher are present.

Answer: B — Neither the student nor the teacher was present.

Solution:

The construction is **neither...nor**. Here, the nearer subject is “teacher,” which is singular, so **was** is appropriate.

Question 15

“To scrutinise” means:

- A. To examine carefully
- B. To ignore completely
- C. To destroy
- D. To postpone

Answer: A — To examine carefully.

Solution:

“Scrutinise” means to examine something **very carefully or critically**.

Question 16

The evidence was insufficient to _____ the allegation.

- A. substantiate
- B. celebrate
- C. conceal
- D. postpone

Answer: A — substantiate.

Solution:

“Substantiate” means **to support or establish something with evidence**.

Question 17

“Ambiguous” means:

- A. Having a clear meaning
- B. Having more than one possible meaning

- C. Completely false
- D. Legally binding

Answer: B — Having more than one possible meaning.

Solution:

An ambiguous statement can reasonably be understood in **more than one way**.

Question 18

Choose the correct sentence:

- A. The committee have submitted its report.
- B. The committee has submitted its report.
- C. The committee has submit its report.
- D. The committee submitting its report.

Answer: B — The committee has submitted its report.

Solution:

Here “committee” is treated as a singular collective noun, so **has submitted** is grammatically appropriate.

Question 19

“Pragmatic” most nearly means:

- A. Practical
- B. Emotional
- C. Theoretical
- D. Traditional

Answer: A — Practical.

Solution:

A pragmatic approach focuses on **practical results and realistic considerations**.

Question 20

Which word is closest in meaning to “coherent”?

- A. Logical and connected
- B. Confused
- C. Contradictory
- D. Unrelated

Answer: A — Logical and connected.

Solution:

A coherent argument is one in which the ideas are **logically connected and understandable**.

SECTION II — CURRENT AFFAIRS & GENERAL KNOWLEDGE**Passage 3**

Artificial intelligence has moved from specialised research laboratories into everyday life. AI systems can translate languages, generate images, analyse large quantities of information and assist professionals in many fields. At the same time, questions have emerged regarding privacy, misinformation, employment and accountability.

One important question is not simply whether machines can perform particular tasks, but who should be responsible when an automated system causes harm. The development of technology therefore creates both opportunities and demands for appropriate regulation.

Question 21

Which of the following is NOT mentioned as an issue concerning AI?

- A. Privacy
- B. Misinformation
- C. Employment
- D. Ocean pollution

Answer: D — Ocean pollution.

Solution:

The passage mentions **privacy, misinformation, employment and accountability**. Ocean pollution is not mentioned.

Question 22

The passage suggests that AI regulation may be necessary because:

- A. Technology has no benefits.
- B. Automated systems may create consequences requiring accountability.
- C. Machines can never perform useful tasks.
- D. AI exists only in laboratories.

Answer: B — Automated systems may create consequences requiring accountability.

Solution:

The passage raises the question of **who should be responsible when an**

automated system causes harm. This creates a need for appropriate regulation.

Question 23

Which of the following is an example of AI application mentioned in the passage?

- A. Language translation
- B. Construction of roads
- C. Mining coal
- D. Growing crops

Answer: A — Language translation.

Solution:

The passage expressly states that AI systems can **translate languages**.

Question 24

The central concern of the passage is:

- A. Whether technology should disappear
- B. Balancing technological opportunities with accountability
- C. Whether machines are cheaper than humans
- D. Whether computers should be banned

Answer: B — Balancing technological opportunities with accountability.

Solution:

The passage recognises both the benefits of AI and the concerns relating to privacy, misinformation, employment and responsibility.

Question 25

Which institution is India's principal constitutional court?

- A. High Court
- B. Supreme Court
- C. District Court
- D. Tribunal

Answer: B — Supreme Court.

Solution:

The Supreme Court of India is the **apex constitutional court** of the country.

Passage 4

Climate policy frequently involves difficult choices. Governments may wish to reduce dependence on fossil fuels while ensuring that households and industries continue to receive affordable energy. Renewable energy can reduce environmental damage, but its expansion may require significant investment in infrastructure and storage.

The challenge is therefore not simply to choose between economic development and environmental protection. Policymakers must attempt to design systems in which economic activity can continue while environmental costs are progressively reduced.

Question 26

The passage identifies the principal challenge as:

- A. Ending all economic activity
- B. Balancing economic needs and environmental protection
- C. Increasing fossil-fuel consumption
- D. Eliminating renewable energy

Answer: B — Balancing economic needs and environmental protection.

Solution:

The passage says policymakers must allow economic activity to continue while reducing environmental costs.

Question 27

Renewable energy may require:

- A. No investment
- B. Investment in infrastructure and storage
- C. Elimination of electricity
- D. Reduction of technology

Answer: B — Investment in infrastructure and storage.

Solution:

The passage expressly states that expansion of renewable energy may require significant investment in **infrastructure and storage**.

Question 28

The passage suggests that climate policy involves:

- A. Simple choices
- B. Difficult policy trade-offs
- C. No economic considerations
- D. No environmental considerations

Answer: B — Difficult policy trade-offs.

Solution:

The first sentence states that climate policy involves **difficult choices** because governments must balance several competing objectives.

Question 29

Which statement best reflects the author's position?

- A. Economic development and environmental protection are necessarily incompatible.
- B. Environmental protection should always be ignored.
- C. Policies should attempt to reconcile economic activity with environmental protection.
- D. Fossil fuels should always be increased.

Answer: C — Policies should attempt to reconcile economic activity with environmental protection.

Solution:

This accurately reflects the final sentence of the passage.

Question 30

The term “progressively” most nearly means:

- A. Gradually
- B. Suddenly
- C. Randomly
- D. Secretly

Answer: A — Gradually.

Solution:

In this context, “progressively reduced” means **reduced gradually over time**.

General Knowledge

Question 31

The Constitution of India was adopted on:

- A. 15 August 1947
- B. 26 November 1949
- C. 26 January 1950
- D. 2 October 1950

Answer: B — 26 November 1949.

Solution:

The Constituent Assembly adopted the Constitution on **26 November 1949**.

Question 32

The Constitution came into force on:

- A. 26 January 1950
- B. 26 November 1949
- C. 15 August 1947
- D. 9 December 1946

Answer: A — 26 January 1950.

Solution:

The Constitution became operative on **26 January 1950**, celebrated as Republic Day.

Question 33

Fundamental Rights are contained primarily in:

- A. Part II
- B. Part III
- C. Part IV
- D. Part V

Answer: B — Part III.

Solution:

Fundamental Rights are contained in **Part III**, Articles 12–35.

Question 34

The Directive Principles of State Policy are contained in:

- A. Part III
- B. Part IV
- C. Part V
- D. Part VI

Answer: B — Part IV.

Solution:

The Directive Principles are contained in **Part IV of the Constitution**.

Question 35

The constitutional provision dealing with equality before law is:

- A. Article 12
- B. Article 14
- C. Article 19
- D. Article 21

Answer: B — Article 14.

Solution:

Article 14 provides **equality before the law and equal protection of the laws.**

Question 36

The International Court of Justice is located at:

- A. Geneva
- B. Paris
- C. The Hague
- D. New Delhi

Answer: C — The Hague.

Solution:

The ICJ is headquartered at **The Hague, Netherlands.**

Question 37

The headquarters of the United Nations is in:

- A. New York
- B. London
- C. Rome
- D. Geneva

Answer: A — New York.

Solution:

The principal headquarters of the United Nations is in **New York City.**

Question 38

The Reserve Bank of India is India's:

- A. Central bank
- B. Supreme financial court

- C. Stock exchange
- D. Tax tribunal

Answer: A — Central bank.

Solution:

The RBI is India's **central banking institution**.

Question 39

The Green Revolution in India is primarily associated with:

- A. Industrialisation
- B. Agricultural productivity
- C. Computer technology
- D. Space research

Answer: B — Agricultural productivity.

Solution:

The Green Revolution is associated with substantial increases in agricultural production, especially food-grain production.

Question 40

The Indian Parliament consists of:

- A. Lok Sabha only
- B. Rajya Sabha only
- C. President and two Houses
- D. Supreme Court and two Houses

Answer: C — President and two Houses.

Solution:

Parliament consists of the **President, Lok Sabha and Rajya Sabha**.

SECTION III — LEGAL REASONING

The official CLAT syllabus describes Legal Reasoning as requiring candidates to identify principles from passages, apply those principles to facts and understand how changes in principles affect their application.

Question 41

Principle: A person who intentionally causes damage to another's property without lawful justification may be liable for the resulting loss.

A deliberately scratches B's newly purchased car because of a personal dispute.

Is A potentially liable?

- A. No, because the dispute was personal.
- B. Yes, because the damage was intentional and unjustified.
- C. No, because cars cannot be property.
- D. Yes, but only if B is a company.

Answer: B — Yes, because the damage was intentional and unjustified.

Solution:

The principle requires intentional damage without lawful justification. A deliberately damaged B's property because of a personal dispute. Therefore, A potentially incurs liability.

Question 42

Which fact would most strengthen A's defence?

- A. A had lawful authority to damage the car.
- B. A disliked B.
- C. B had criticised A.
- D. A knew B personally.

Answer: A — A had lawful authority to damage the car.

Solution:

The principle applies only when the damage is **without lawful justification**. Lawful authority would therefore be the strongest defence.

Question 43

A offers to sell a laptop to B for ₹50,000. B says, "I accept your offer."

What has B communicated?

- A. Acceptance
- B. Revocation
- C. Tort
- D. Negligence

Answer: A — Acceptance.

Solution:

B has expressly agreed to the terms of A's offer. This is acceptance.

Question 44

If B instead says, "I will buy it for ₹40,000," this is:

- A. Acceptance
- B. Counter-offer
- C. Performance
- D. Consideration

Answer: B — Counter-offer.

Solution:

B is proposing a different price. Therefore, B has not accepted the original offer but has made a **counter-offer**.

Question 45

Principle: Negligence requires a duty of care, breach of that duty and resulting damage.

A driver drives recklessly through a crowded market and hits a pedestrian.

Which element is most clearly present?

- A. Breach of duty
- B. Consent
- C. Absence of damage
- D. Lawful justification

Answer: A — Breach of duty.

Solution:

Driving recklessly through a crowded market is strong evidence of a breach of the duty to exercise reasonable care.

Question 46

If nobody is injured and no property is damaged, which element is difficult to establish?

- A. Duty
- B. Breach
- C. Damage
- D. Driving

Answer: C — Damage.

Solution:

The principle requires resulting damage. If there is no injury or property damage, the damage element is absent.

Question 47

A voluntarily enters a properly organised boxing competition and is injured by a lawful punch.

Which principle is most relevant?

- A. Volenti non fit injuria
- B. Res judicata
- C. Caveat emptor
- D. Audi alteram partem

Answer: A — Volenti non fit injuria.

Solution:

The principle concerns **voluntary acceptance of an ordinary risk**. A participant in boxing generally accepts ordinary risks associated with lawful punches.

Question 48

If the opponent intentionally attacks the participant with a weapon after the match ends, the principle:

- A. Must always protect the opponent.
- B. May not apply because the conduct exceeds the accepted risk.
- C. Automatically makes the attack lawful.
- D. Converts the attack into a contract.

Answer: B — May not apply because the conduct exceeds the accepted risk.

Solution:

The participant accepted ordinary risks of boxing, not an intentional weapon attack after the match. Therefore, the conduct falls outside the accepted risk.

Question 49

A performs an act on 1 January. On 1 February, a new law declares that act criminal.

Can A ordinarily be punished under the new criminal law for the January act?

- A. Yes, always
- B. No, because the act was not criminal when committed
- C. Yes, because all laws operate retrospectively
- D. Only if A is wealthy

Answer: B — No, because the act was not criminal when committed.

Solution:

The stated principle prohibits punishment for conduct that was not criminal at the time it was committed.

Question 50

The principle primarily protects against:

- A. Retrospective criminal punishment
- B. Contractual breach
- C. Property disputes
- D. Taxation

Answer: A — Retrospective criminal punishment.

Solution:

A person should not ordinarily be punished under a criminal law enacted after the conduct occurred.

Question 51

A law gives additional educational support to persons with specified disabilities.

Which argument best supports the classification?

- A. All classifications are unconstitutional.
- B. The classification may have a rational relationship with improving accessibility.
- C. Disability can never be relevant to law.
- D. Equality means everyone must always receive identical treatment.

Answer: B — The classification may have a rational relationship with improving accessibility.

Solution:

The stated principle permits reasonable classification where there is an intelligible basis and rational connection with the law's objective. Educational support for persons with disabilities can satisfy that test.

Question 52

A classification having no rational connection with the purpose of the law is:

- A. More likely to be valid
- B. More likely to be arbitrary
- C. Automatically mandatory
- D. A Fundamental Right

Answer: B — More likely to be arbitrary.

Solution:

A classification must have a rational relationship with the objective. Without such a relationship, it is vulnerable to challenge as arbitrary.

Question 53

A knowingly tells B that a machine is new when A knows it is heavily used. B purchases it relying on the statement.

Which fact is especially important?

- A. A knew the statement was false.
- B. A and B were neighbours.
- C. B liked the machine's colour.
- D. The machine was heavy.

Answer: A — A knew the statement was false.

Solution:

The principle specifically requires a **knowing false statement**. Therefore, A's knowledge of falsity is critical.

Question 54

If A honestly believed the machine was new, which element becomes difficult to establish?

- A. Knowledge of falsity
- B. Existence of the machine
- C. Identity of B
- D. Payment

Answer: A — Knowledge of falsity.

Solution:

If A genuinely believed the statement was true, it becomes difficult to prove that A **knowingly** made a false statement.

Question 55

A university expels a student without allowing the student to respond to the allegations.

Which principle is most relevant?

- A. Audi alteram partem
- B. Caveat emptor
- C. Res ipsa loquitur
- D. Nemo dat

Answer: A — Audi alteram partem.

Solution:

The principle of natural justice requiring an affected person to be heard is **audi alteram partem**.

Question 56

“Audi alteram partem” means:

- A. No one should be a judge in their own cause.
- B. Hear the other side.
- C. Let the buyer beware.
- D. The thing speaks for itself.

Answer: B — Hear the other side.

Solution:

“Audi alteram partem” means **hear the other side**. It reflects the right to a fair opportunity to be heard.

Question 57

A person is presumed innocent until proved guilty according to law. Which statement follows?

- A. The accused must always prove innocence.
- B. The prosecution bears the burden of establishing guilt according to law.
- C. The accused is guilty merely because an allegation is made.
- D. No criminal trial is necessary.

Answer: B — The prosecution bears the burden of establishing guilt according to law.

Solution:

The presumption of innocence means an allegation alone does not establish guilt. The prosecution must prove the case according to law.

Question 58

The presumption of innocence primarily protects against:

- A. Arbitrary assumption of guilt
- B. Contractual liability
- C. Property registration
- D. Civil taxation

Answer: A — Arbitrary assumption of guilt.

Solution:

A person cannot be treated as guilty merely because an accusation has been made.

Question 59

A has no ownership interest in a house but purports to sell it to B.

What is the general position?

- A. A automatically gives B perfect title.
- B. A cannot ordinarily transfer a better title than A possesses.
- C. B becomes owner merely because money is paid.
- D. Ownership is irrelevant.

Answer: B — A cannot ordinarily transfer a better title than A possesses.

Solution:

The principle states that a transferor cannot ordinarily give a transferee a better title than the transferor possesses, subject to recognised exceptions.

Question 60

Which maxim expresses this principle?

- A. Nemo dat quod non habet
- B. Audi alteram partem
- C. Volenti non fit injuria
- D. Res judicata

Answer: A — Nemo dat quod non habet.

Solution:

The maxim means, broadly, “**no one gives what they do not have.**”

Question 61

A deliberately prevents B from entering B's own business premises without any lawful justification.

A's conduct is:

- A. Potentially unlawful interference
- B. Automatically lawful
- C. Irrelevant because B owns the premises
- D. A contractual offer

Answer: A — Potentially unlawful interference.

Solution:

A intentionally interferes with B's lawful exercise of a protected right and has no stated legal justification.

Question 62

Which fact would most strongly support A's defence?

- A. A had lawful authority to restrict entry.
- B. A disliked B.
- C. A and B had previously argued.
- D. B was late for work.

Answer: A — A had lawful authority to restrict entry.

Solution:

The principle applies to interference **without lawful justification**. Lawful authority directly addresses that requirement.

Question 63

This principle is commonly known as:

- A. Double jeopardy
- B. Caveat emptor
- C. Strict liability
- D. Estoppel

Answer: A — Double jeopardy.

Solution:

The principle against being punished twice for the same offence is commonly called **double jeopardy**.

Question 64

In India, constitutional protection against double jeopardy is associated with:

- A. Article 14
- B. Article 19
- C. Article 20(2)
- D. Article 32

Answer: C — Article 20(2).

Solution:

Article 20(2) provides constitutional protection against being **prosecuted and punished for the same offence more than once**.

Question 65

Which situation most clearly raises the issue?

- A. A person being tried again for the same offence after a final conviction.
- B. A person changing jobs.
- C. A person entering into a contract.
- D. A person purchasing property.

Answer: A — A person being tried again for the same offence after a final conviction.

Solution:

This directly raises the issue of a second prosecution/punishment for the same offence.

SECTION IV — LOGICAL REASONING

The official CLAT syllabus specifically requires candidates to identify arguments, premises and conclusions, analyse reasoning, identify assumptions, and determine how arguments are strengthened or weakened.

Passage 5

A city plans to increase the number of buses operating on its roads. The mayor argues that this will reduce traffic congestion because more residents will use public transport instead of private cars. Critics argue that simply adding buses will not reduce congestion if the buses are unreliable or if passengers continue to prefer private vehicles.

Question 66

What is the mayor's main conclusion?

- A. Private vehicles should be banned.
- B. Increasing buses can reduce traffic congestion.
- C. Public transport is always unreliable.
- D. Traffic congestion cannot be reduced.

Answer: B — Increasing buses can reduce traffic congestion.

Solution:

This is the conclusion directly asserted by the mayor. The reason given is that more people may switch from private cars to public transport.

Question 67

Which assumption supports the mayor's argument?

- A. Some people may switch from private vehicles to buses.
- B. Everyone dislikes buses.
- C. Cars are cheaper than buses.
- D. Buses cause traffic congestion.

Answer: A — Some people may switch from private vehicles to buses.

Solution:

The mayor's argument depends on residents actually changing their mode of transport. Without that assumption, more buses would not necessarily reduce congestion.

Question 68

Which fact would most strengthen the mayor's argument?

- A. A similar city reduced congestion after substantially increasing reliable bus services.
- B. Some people prefer motorcycles.
- C. Bus drivers require training.
- D. Some roads are narrow.

Answer: A — A similar city reduced congestion after substantially increasing reliable bus services.

Solution:

This provides evidence supporting the proposed relationship between increased reliable bus services and reduced congestion.

Question 69

Which fact would most weaken the argument?

- A. The additional buses are expected to remain largely empty.
- B. Bus fares are affordable.
- C. More buses are being purchased.
- D. Bus routes are being advertised.

Answer: A — The additional buses are expected to remain largely empty.

Solution:

If the buses remain empty, people are not switching from private vehicles. Therefore, the proposed reduction in congestion becomes less likely.

Question 70

The critics' argument primarily challenges:

- A. The assumption connecting more buses with reduced congestion.
- B. The existence of roads.
- C. The cost of fuel.
- D. The number of passengers in taxis.

Answer: A — The assumption connecting more buses with reduced congestion.

Solution:

The critics say simply adding buses will not necessarily work if people do not use them or if the buses are unreliable. This challenges the causal connection.

Passage 6

A school introduces daily reading sessions. The principal argues that students who read regularly will develop stronger vocabulary. A teacher objects that vocabulary depends on many factors, including the quality of reading and the student's existing language skills.

Question 71

What is the principal's conclusion?

- A. Reading is unnecessary.
- B. Daily reading can improve vocabulary.
- C. Students should stop studying vocabulary.
- D. Existing language skills are irrelevant.

Answer: B — Daily reading can improve vocabulary.

Solution:

This is the principal's stated conclusion.

Question 72**Which would strengthen the principal's argument?**

- A. Students participating in the reading programme show greater vocabulary improvement than comparable students.
- B. Students enjoy sports.
- C. The school has a library.
- D. Reading sessions occur in classrooms.

Answer: A — Students participating in the reading programme show greater vocabulary improvement than comparable students.

Solution:

This provides direct comparative evidence that the programme improves vocabulary.

Question 73**Which would weaken the argument?**

- A. Students spend the reading sessions reading material far below their language level.
- B. Students read every day.
- C. Students have access to books.
- D. Teachers supervise the sessions.

Answer: A — Students spend the reading sessions reading material far below their language level.

Solution:

If the material is too easy, regular reading may not substantially expand vocabulary. This weakens the claim.

Question 74**The teacher's objection suggests that:**

- A. Reading is the only factor affecting vocabulary.
- B. Vocabulary development may depend on multiple factors.
- C. Students cannot learn vocabulary.
- D. Reading has no educational value.

Answer: B — Vocabulary development may depend on multiple factors.

Solution:

The teacher specifically mentions the **quality of reading** and **existing language skills**, showing that multiple factors may affect vocabulary.

Question 75

Which statement best captures the disagreement?

- A. Whether reading exists
- B. Whether daily reading alone is sufficient to improve vocabulary
- C. Whether schools should have teachers
- D. Whether students can read

Answer: B — Whether daily reading alone is sufficient to improve vocabulary.

Solution:

The principal focuses on regular reading, while the teacher says other factors also matter. Hence the disagreement concerns sufficiency.

Passage 7

A company claims that employees who work from home are more productive because they save commuting time. A researcher responds that productivity cannot be measured solely by time saved, because home workers may also face distractions and communication difficulties.

Question 76

What is the company's central claim?

- A. Working from home always reduces productivity.
- B. Saving commuting time can increase productivity.
- C. Employees should never commute.
- D. Communication is unnecessary.

Answer: B — Saving commuting time can increase productivity.

Solution:

The company argues that employees are more productive because they save commuting time.

Note: The uploaded answer-key table lists **A** for Q76, but that conflicts with the actual question and passage. The logically correct answer is **B**.

Question 77

The researcher's argument challenges:

- A. The assumption that saved commuting time necessarily translates into greater productivity.
- B. The existence of employees.
- C. The existence of communication.
- D. The length of the working day.

Answer: A — The assumption that saved commuting time necessarily translates into greater productivity.

Solution:

The researcher points out that distractions and communication problems may offset the benefit of saved commuting time.

Question 78

Which fact would strengthen the company's argument?

- A. Employees working from home complete more measurable tasks within the same working hours.
- B. Some employees dislike working from home.
- C. Internet connections vary.
- D. Some employees have long commutes.

Answer: A — Employees working from home complete more measurable tasks within the same working hours.

Solution:

Actual evidence showing greater productivity would directly support the company's claim.

Question 79

Which fact would weaken the company's claim?

- A. Home workers spend substantial work time dealing with distractions.
- B. Commuting can take an hour.
- C. Employees have computers.
- D. Offices have meeting rooms.

Answer: A — Home workers spend substantial work time dealing with distractions.

Solution:

This provides a reason why saved commuting time may not result in greater overall productivity.

Question 80

The passage primarily concerns:

- A. A causal claim about productivity
- B. A historical event
- C. A legal dispute
- D. A mathematical theorem

Answer: A — A causal claim about productivity.

Solution:

The company claims that **saving commuting time causes increased productivity**. The researcher challenges that causal connection.

Questions 81–85

Five students—A, B, C, D and E—are ranked according to marks.

- A scores higher than B.
- B scores higher than C.
- D scores higher than A.
- E scores lower than C.

Therefore:

D > A > B > C > E

Question 81

Who has the highest marks?

- A. A
- B. B
- C. D
- D. E

Answer: C — D.

Solution:

Given $D > A > B > C > E$, D is the highest.

Question 82

Who has the lowest marks?

- A. A
- B. C
- C. D
- D. E

Answer: D — E.

Solution:

E is below C, and C is below B, A and D. Therefore E is lowest.

Question 83

Which order is necessarily correct?

- A. D-A-B-C-E
- B. A-D-B-C-E
- C. D-B-A-C-E
- D. E-C-B-A-D

Answer: A — D-A-B-C-E.

Solution:

Given:

- $D > A$
- $A > B$
- $B > C$
- $C > E$

Therefore:

$D > A > B > C > E$

Question 84

Who is immediately below B?

- A. A
- B. C
- C. D
- D. E

Answer: B — C.

Solution:

The order is $D \rightarrow A \rightarrow B \rightarrow C \rightarrow E$. Therefore, C is immediately below B.

Question 85

Which statement must be true?

- A. D scores higher than C.
- B. C scores higher than D.
- C. E scores higher than B.
- D. A scores higher than D.

Answer: A — D scores higher than C.

Solution:

Since $D > A > B > C$, D necessarily scores higher than C.

Questions 86–90

Five books—P, Q, R, S and T—are arranged from left to right.

- P is to the left of Q.
- S is between P and Q.
- R is to the right of Q.
- T is at the extreme right.

One possible arrangement is:

P – S – Q – R – T

Question 86

Which book must be to the left of Q?

- A. P
- B. R
- C. T
- D. None

Answer: A — P.

Solution:

The condition directly states that **P is to the left of Q**.

Question 87

Which book is at the extreme right?

- A. P
- B. Q
- C. R
- D. T

Answer: D — T.

Solution:

The condition explicitly states that T is at the extreme right.

Question 88

Which arrangement could be correct?

- A. P-S-Q-R-T
- B. S-P-Q-T-R
- C. P-Q-S-R-T
- D. Q-P-S-R-T

Answer: A — P-S-Q-R-T.

Solution:

Check A:

- P is left of Q ✓
- S is between P and Q ✓
- R is right of Q ✓
- T is extreme right ✓

Therefore A satisfies all conditions.

Question 89

S must be:

- A. Between P and Q
- B. Between Q and R
- C. To the right of T
- D. At the extreme right

Answer: A — Between P and Q.

Solution:

This condition is expressly given.

Question 90

Which statement must be true?

- A. P is left of Q.
- B. R is left of Q.
- C. T is left of P.
- D. S is right of Q.

Answer: A — P is left of Q.

Solution:

This is one of the original conditions, so it must be true.

SECTION V — QUANTITATIVE TECHNIQUES

The official CLAT syllabus describes Quantitative Techniques as sets of numerical information followed by questions requiring candidates to derive, infer and manipulate that information.

Data Set 1

Course	Students
CLAT UG	120
AILET UG	80
CLAT + AILET Integrated	150
Foundation	50

Question 91

What is the total number of students?

- A. 350
- B. 380
- C. 400
- D. 420

Answer: C — 400.

Solution:

$$120+80+150+50=400$$

Therefore, the total number of students is **400**.

Question 92

What percentage of the students are enrolled in CLAT UG?

- A. 25%
- B. 30%
- C. 35%
- D. 40%

Answer: B — 30%.

Solution:

CLAT UG students = 120

Total students = 400

$$\frac{120}{400} \times 100 = 30\%$$

Therefore, **B**.

Question 93

What is the ratio of CLAT UG students to AILET UG students?

- A. 2:3
- B. 3:2
- C. 4:3
- D. 5:2

Answer: B — 3:2.

Solution:

120:80

Divide both numbers by 40:

3:2

Therefore, **B**.

Question 94

How many more students are enrolled in the Integrated course than in the Foundation course?

- A. 80
- B. 90
- C. 100
- D. 110

Answer: C — 100.

Solution:

Integrated course = 150

Foundation = 50

$150 - 50 = 100$

Therefore, **C**.

Data Set 2

A student takes a mock test containing 80 questions.

- Correct = 60
- Incorrect = 12
- Unattempted = 8
- Correct = +1 mark
- Incorrect = -0.25 mark

Question 95

What is the student's score?

- A. 56
- B. 57
- C. 58
- D. 59

Answer: B — 57.

Solution:

Marks for correct answers:

$$60 \times 1 = 60$$

Penalty for incorrect answers:

$$12 \times 0.25 = 3$$

Final score:

$$60 - 3 = 57$$

Therefore, **B**.

Question 96

What is the student's accuracy among attempted questions?

- A. 75%
- B. 80%
- C. 83.33%
- D. 85%

Answer: C — 83.33%.

Solution:

Attempted questions:

$$60 + 12 = 72$$

Accuracy:

$$60 \div 72 \times 100 = 83.33\% = 83.33\%$$

Therefore, **C**.

Question 97

If the student had answered all 8 unattempted questions correctly, what would the score have been?

- A. 64
- B. 65
- C. 66
- D. 68

Answer: B — 65.

Solution:

Existing score:

$$57$$

Eight additional correct answers:

$$8 \times 1 = 8$$

New score:

$$57 + 8 = 65$$

Therefore, **B**.

Important correction: The original answer-key table in the uploaded paper gives C for Q97, but the calculation immediately below it correctly establishes **B = 65**.

Data Set 3

A student's marks in five mock tests are:

60, 70, 80, 75 and 65.

Question 98

What is the average mark?

- A. 65
- B. 68
- C. 70
- D. 72

Answer: C — 70.

Solution:

Total:

$$60+70+80+75+65=350$$

Number of tests = 5

$$350 \div 5 = 70$$

Therefore, **C**.

Question 99

If the student scores 85 in the sixth mock test, what will be the new average?

- A. 70
- B. 71.67
- C. 72.5
- D. 75

Answer: C — 72.5.

Solution:

Previous total:

$$350$$

Sixth test:

$$85$$

New total:

$$350+85=435$$

Number of tests:

$$6$$

New average:

$$4356 = 72.5 \times \frac{435}{6} = 72.5$$

Therefore, **C**.

The uploaded answer-key table initially gives B for Q99, but its own calculation correctly gives **72.5 = C**.

Question 100

What is the difference between the highest and lowest marks?

- A. 15
- B. 20
- C. 25
- D. 30

Answer: B — 20.

Solution:

Highest mark = 80

Lowest mark = 60

$$80 - 60 = 20$$

Therefore, **B**.

The uploaded paper's original answer table gives C for Q100, but the calculation provided in the same document gives **20 = B**.
